

Horizon 2020 Framework Programme
Grant Agreement: 732328 – FashionBrain

Document Information

Deliverable number: D2.5

Deliverable title: Library of trained deep learning models

Deliverable description: This deliverable comprises a library of Artificial Neural Networks that can be easily applied to new and unseen fashion related images in order to enrich them with various meta-attributes and information about global features. Training of the models has been performed in the course of T2.4, and the resulting model parameters are already part of the library. The library makes it easy, however, to refine the model parameters with subsequent training on further labeled data.

Due date of deliverable: M18

Actual date of deliverable: June 30th, 2018

Authors: Duncan Blythe

Project partners: Zalando, Fashwell

Workpackage: 2

Dissemination Level: **confidential**
